temperature. If the freezer temperature is below -2°F write in the actual temperature. *Take* action immediately if the freezer temperature is above 5°F. Also, enter your initials and the time that the temperatures were read in the boxes at the top of the chart.

IF THE TEMPERATURE FALLS IN THE SHADED AREA:

- 1. Move vaccine to alternate storage as quickly as possible.
- 2. Isolate and label the vaccine "DO NOT USE."
- 3. Notify the CDPHE Immunization Section at: 303-692-2700 or: cdphe_vfc@state.co.us for guidance.
- 4. Document the date of the incident, actions taken, and any corrective measures instituted on troubleshooting record.
- 5. Call the vaccine manufacturer to determine vaccine viability.

Attach separate sheet if necessary.

Vaccine Storage Troubleshooting Record

Use this form to document any unacceptable vaccine storage event, such as exposure of refrigerated vaccines to temperatures that are outside the manufacturers' recommended storage ranges.

Date and Time of Event	Storage Unit Temperature (at the time the problem was discovered)	Room Temperature (at the time the problem was discovered)	Description of Event	Action Taken	Results	Initials
Friday, 01/31/2014 8:00 a.m.	34 F		AM. Last recorded temp 41 F done at 5:15 PM on 1/30/14.	Notified supervisor & activated Vaccine Management Plan. 8:15 AM - Supervisor adjusted thermostat and will recheck temp in 1 hour. 8:30 am - Contacted Nicole at CDPHE. Advised to call manufacturers and report back to VFC with results of	4/31/14 for all vaccines but MMR and ActHib. 11:30 AM- VFC program notified of findings. Advised to keep vaccines in alternate location until main	JC
9:15 AM	34 F		Indue by supervisor	9:20 AM – Vaccines moved to alternate location while waiting results of manufacturer calls. Temp in alternate storage 40 F.		
10:30 AM	34 F	71 F	Temp recheck by supervisor	Repair service called to come repair unit-vaccines will remain in alternate storage unit.
